

GigaContent

A professional TV studio in one package

Want to be on TV or web-TV? GigaContent has the solution. A professional TV studio from GigaContent lets you deliver TV content in full broadcast quality to broadcasters and TV providers in Denmark and abroad, including TV2, DR, and e.g. Bloomberg and CNN. GigaStudio is an important tool for realizing your goals in gaining exposure of your company or organization on TV.

Companies are increasingly turning to TV and web-TV as the direct communications channel when communicating both internally - towards employees - and externally towards clients and shareholders. With GigaStudio - and for example GigaAccess - you can connect quickly to broadcasters for expert commentary on stock trends or news events. Or you can produce TV spots for the company's own web-TV channel with GigaWebTV.

GigaStudio is a simple and user-friendly TV studio including equipment and surroundings for professional production of TV, and we will design and build your studio according to your needs and plans for the future. We also deliver training on how to present yourself on TV in the best way and of course technical support. GigaContent delivers the entire solution.

Our clients all agree:

It is surprisingly simple to produce TV in broadcast quality with GigaStudio.

Why choose GigaStudio?

- Implement your press and communications strategy on Danish or international TV
- Deliver news, expert commentary, coverage of events, and much more from your own TV studio
- Produce web-TV for your own internal web-TV channel
- GigaStudio is a complete solution with everything you need

Expand your GigaStudio solution with:

- Professional transmission access to the TV media with GigaAccess
- Your own TV channel with GigaWebTV
- Access to foreign TV media with GigaXchange

To deliver and support GigaStudio, GigaContent works in partnership with the country's most recognized suppliers of TV studios and equipment for TV production. Our partners offer many years of experience in developing and implementing the right studio solution for you.
